

ABSTRACT OF THE DISCLOSURE

A new and distinct cultivar of *Anthurium andreanum* plant named
'Anthbneq', as described and illustrated, and particular characterized by the combined
features of compact growth and early and rich flowering; mini-type pot plant with
5 large flowers, maximum growth to approximately 40 cm; long and erect peduncle;
flowers held just above the foliage; full plant habit due to rich shoot formation and
compactness of the plant; dark green leaves, durable and very glossy, with light green
primary veins; red and durable flowers, slowly turning brownish-red with age; large
amount of flowers in relation to the amount of leaves resulting in good leaf to flower
10 ratio size.
